anthranilate synthase (EC 4.1.3.27) component I [validated] - Sulf
N.Alternate names: anthranilate synthase alpha chain
C;Species: Sulfolous solifataricus
C;Date: 15-May-1997 #sequence_revision 18-Jul-1997 #text_change 17
C;Accession: JC5323; A40635
R;Tutino, M.L.; Tosco, A.; Marino, G.; Sannia, G.
Biochem. Biophys. Res. Commun. 230, 306-310, 1997
A;Title: Expression of Sulfolobus solifataricus trpE and trpG genes
A;Reference number: JC5323; MUID:97168965
A;Accession: JC5323; MUID:97168965
A;Accession: JC5323; MUID:97168965
A;Accession: JC5323
A;Status: nucleic acid sequence not shown
A;Reference number: DNA
A;Residues: 1-421 < TUT>

       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               DB
